DETAILED ACTION

1. This office action is in response to the amendment filed on October 26, 2006, in which claims 1, 3-12, 14-19, 22-, 25 and 26 are presented for further examination.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 22, 2006 has been entered.

Response to Arguments

3. Applicant's arguments with respect to claims 1, 3-12, 14-19, 22-, 25 and 26 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

16. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

17. Claims 19 and 22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter, specifically, as directed to an abstract idea.

While transferring data between a host device and a storage medium via a buffer could reasonably be considered a tangible result, the body of claims 19 and 22 does not appear to

Art Unit: 2162

actually support the preamble by including a step or steps which accomplish that act.

Additionally, the claims appear to provide no tangible, concrete and useful claimed result to form the basis statutory subject matter under 35 USC 101.
